PROFESSIONAL SUMMARY

Senior SDET Engineer with 4.5+ years architecting enterprise-scale test automation frameworks across mobile (iOS/Android), web, and API ecosystems. AI-driven automation innovator leveraging Amazon Q, GitHub Copilot, and self-healing test scripts to reduce maintenance overhead by 45%. Expert in intelligent CI/CD quality gates, integrating Jenkins, qTest, and JIRA for seamless defect tracking and automated failure analysis. Proficient in Java, Python, Node.js with proven expertise in backend validation, microservices testing, and data-driven test automation. Actively seeking Senior SDET and Test Automation Lead roles where I can architect cutting-edge automation solutions using AI/ML at enterprise scale.

CORE COMPETENCIES

AI & Intelligent QA: Amazon Q (Code Generation) • GitHub Copilot • KIRO/KODA AI Accelerators • Self-Healing Test Scripts • AI Failure Analysis • ML Test Prioritization

Test Automation Frameworks: Selenium WebDriver (Expert) • Appium iOS & Android (Expert) • Playwright (Advanced) • Mocha Framework (Advanced) • Cucumber BDD (Expert)

Programming Languages: Java (Expert, Spring Boot, DSA) • Python (Advanced, Flask, Scikit-learn) • JavaScript/Node.js (Advanced)

API & Backend Testing: REST API Automation • Request/Response Validation • Database Testing (MySQL) • Microservices Testing • Data Integrity Validation

CI/CD & Infrastructure: Jenkins (Expert, Pipeline Configuration) • Git/GitHub • qTest (Test Management) • JIRA (Defect Tracking) • Docker

Testing Expertise: Cross-Platform Automation • Multilingual Test Frameworks • BDD Implementation • Backend Validation • Performance Testing • Security Testing • Regression Testing

PROFESSIONAL EXPERIENCE

Senior SDET Engineer & Automation QA Architect | Accenture, Bengaluru

January 2022 – Present (4.5+ Years)

- Architected and deployed enterprise-grade cross-platform automation frameworks (Selenium, Appium, Playwright) supporting mobile (iOS/Android), web, and REST API ecosystems with 85% regression coverage across 200+ test scenarios
- Pioneered AI-assisted testing implementation: Integrated Amazon Q and GitHub Copilot for intelligent test script generation, reducing test development time by 50% and manual maintenance overhead by 45%
- Designed self-healing test automation using KIRO/KODA accelerators: Automated failure root cause analysis, reducing defect triage time by 87.5% (2 hours to 15 minutes per release)
- Implemented intelligent CI/CD quality gates: Unified Jenkins, qTest, JIRA integration enabling automated defect logging with rich metadata, improving defect resolution SLA by 40%
- Engineered multilingual test automation framework supporting 8+ languages with BDD (Cucumber); achieved 35% regression execution time reduction
- Developed backend validation and microservices testing utilities with mock services; detected 50+ pre-production data integrity issues, reducing critical defects by 30%
- Built comprehensive REST API test suites with database cross-validation, achieving 95% API coverage with 50+ pre-production issues detected
- Mentored juniors QA engineers on SDET best practices, framework design patterns, and CI/CD integration

PROJECT HIGHLIGHTS & TECHNICAL EXPERTISE

Enterprise Mobile Automation – Global Multilingual iOS & Android Applications

Tech Stack: Appium • Cucumber BDD • KIRO/KODA • qTest • Jenkins

- Architected multilingual automation framework supporting 8 languages with dynamic runtime language selection
- Implemented BDD-driven test development using Cucumber for improved test readability
- Achieved 85% functional coverage; reduced regression execution time by 35%

Impact: 85% automation coverage | 35% faster regression | 8-language support

Web Automation with AI-Assisted Testing & Intelligent Failure Analysis

Tech Stack: Selenium WebDriver • Amazon Q • GitHub Copilot • KODA • qTest • JIRA • Jenkins

- Deployed AI-assisted test generation reducing script development time by 50%
- Implemented intelligent failure analysis: Automated root cause detection, reduced triage time by 87.5%
- Stabilized regression suites during critical release phases; integrated with Jenkins for continuous QA

Impact: 50% dev time reduction | 87.5% triage reduction | 100% critical coverage

API Automation & Backend Validation with Database Cross-Validation

Tech Stack: Mocha • Node.js • REST APIs • MySQL • PostgreSQL • Python

- Designed comprehensive REST API test suites with request/response validation and database assertions
- Built backend validation utilities ensuring data integrity across microservices; detected 50+ pre-production issues
- Achieved 95% API coverage with automated CI/CD pipeline integration

Impact: 95% API coverage | 50+ issues detected | 30% defect reduction

KEY METRICS & BUSINESS IMPACT

- ✓ **85% Test Code Coverage:** Comprehensive automation across web, mobile (iOS/Android), and REST APIs with 200+ test scenarios
- ✓ **50% Test Development Time Reduction:** AI-assisted script generation using Amazon Q and GitHub Copilot
- ✓ **87.5% Triage Time Reduction:** KODA-powered failure root cause analysis (2 hours → 15 minutes)
- ✓ **45% Maintenance Overhead Reduction:** Self-healing test automation and intelligent failure analysis
- ✓ **40% Defect Resolution SLA Improvement:** Intelligent CI/CD gates with unified Jenkins-qTest-JIRA integration
- ✓ **35% Regression Execution Time Reduction:** BDD-driven multilingual framework optimization
- ✓ **30% Critical Defects Reduction:** Backend validation and microservices testing utilities
- ✓ **95% API Coverage:** Comprehensive REST API test automation with database cross-validation

CERTIFICATIONS, AWARDS & RECOGNITION

- ✓ **Databricks – Generative AI Engineer Associate** / 2025
- ✓ **IBM – Data Science Professional Certificate** / 2020
- ✓ **NPTEL – Java Programming Certification** / 2019
- ✓ **Runner-up – Smart India Hackathon 2020** / 2020
- ✓ **LeetCode – 400+ DSA Problems Solved** / Ongoing
- ✓ **HackerRank – Gold Badge (Java), Silver Badge (Problem Solving)** / Ongoing

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering / *Sona College of Technology, Tamil Nadu (2017–2021)*
